The graph displays two data series: 'median (16.8 CPU)' represented by a red line and 'global (15.9 CPU)' represented by a black line. The x-axis is labeled 'Frequency (MHz)' and ranges from 30 to 80. The y-axis represents CPU usage percentage, ranging from 0 to 100. Both lines show significant fluctuations, with the red line generally exhibiting higher peaks and deeper troughs than the black line. A legend in the top right corner identifies the two series.
